

Executive Director of Iberdrola Renovables Internacional S.A.U.

Telecommunications Engineer from the Polytechnic University of Madrid and International master's in business management from the Institute for Executive Development

Director of Northern and Central Europe. Iberdrola Group Renewables Business.
Member of the Renewables Executive Committee.

OUTSTANDING EXPERIENCE FOR THE DEVELOPMENT OF THEIR POSITIONS IN SOCIETY:

In 2006 he joined Iberdrola where he has held different positions, always linked to development and growth actively participating in the IBR IPO team. In 2010 he became Head of the Investment office of the Renewables group for the whole world, until 2017 when he assumed the Direction of Products and Solutions. This team is renamed Global Development in mid-2019, expanding in scope and responsibilities, covering, in addition to the analysis of new renewable products, engineering and the development of the company's growth plan. Finally, in January 2022 he assumes the direction of the Northern and Central Europe platform, managing the income statement and all development activities in this area of the world that covers all the countries of continental Europe with the exception of Italy, Spain and Portugal.

Professional experience prior to Iberdrola

He began his professional practice developing M&A projects, internationalization of companies and market analysis for Deloitte Consulting and later in the strategic services of Accenture.
